Contents

1	Introduction	1
1.1	Scope and Modelling	2
1.2	Historical Facts	3
1.2.1	The First Wave of Globalization	4
1.2.2	The Second Wave of Globalization	8
1.3	Why an Analytical Model?	9
2	The Short-Run IS–LM model	13
2.1	Building Blocks of the Model	14
2.2	Accounting, Behavioral Equations and Equilibrium	16
2.3	Economic Insights	21
2.4	Implications for Empirical Analysis	22
2.4.1	The Marshall-Lerner Condition	23
2.4.2	Exchange-rate Pass Through	24
2.4.3	The real, the Effective, and the real Effective Exchange Rates	24
3	The Medium-Run IS–LM Model	27
3.1	The Medium-run Equilibrium	27
3.2	Economic Insights	30
3.3	Characterization of Equilibrium	33
3.3.1	The Floating Exchange Rate	34
3.3.2	The Fixed Exchange Rate	36
3.4	Implications for Empirical Analysis	37
3.4.1	The Purchasing Power Parity	37
3.4.2	Risk Neutrality	37
3.4.3	Expectations	38
4	Medium-run Adjustment	41
4.1	Complete Price Adjustment	42
4.2	Incomplete Price Adjustment	46
4.3	Implications for Empirical Analysis	49

5	Empirical Evidence	51
5.1	Under- and Over-valued Exchange Rates	51
5.2	Uncovered Interest Parity Condition	53
5.2.1	The Rational Expectations Hypothesis	54
5.2.2	The Currency Carry Trade	56
5.2.3	The Forward Bias	57
5A.1	Futures Contracts	59
5A.2	Valuation: Cash-and-carry Pricing	61
6	Economic Policy under a Fixed Exchange Rate	63
6.1	Macroeconomic Policy Effectiveness	63
6.2	How does a Peg Work?	65
6.3	Why do Pegs Collapse?	67
6.3.1	Incompatible Monetary Policy Objectives	67
6.3.2	Incompatible Monetary Policy and Economic Stabilization Objectives	68
6.3.3	Self-fulfilling Prophecies	69
6.3.4	Short-selling in Currency Markets	70
6.3.5	Failed Speculative Attacks	71
6A.1	Balance of Payments Accounts	71
6A.2	Swaps	73
6A.2.1	Currency Swaps	73
6A.2.2	Interest Rate Swaps	74
7	Economic Policy under a Floating Exchange Rate	77
7.1	Macroeconomic Policy Effectiveness	77
7.2	Monetary Policy Reaction Function	78
7.3	Empirical Evidence	80
7.3.1	Monetary Policy	80
7.3.2	Fiscal Policy	82
8	The Policy Trilemma in Open Economies	85
8.1	Capital Controls	86
8.2	Policy Trilemma: Intermediate Objectives and Instruments	87
8.3	Ultimate Policy Objectives and Choices	88
8.3.1	Disturbances: A Classification	89
8.3.2	Stabilization and Unrestricted Capital Mobility	89
8.3.3	Stabilization versus Unrestricted Capital Mobility	90
9	Risk and Insurance in International Finance	93
9.1	Uncertainty and Risk	95
9.1.1	Coping with Uncertainty at the Individual Level	95
9.1.2	Demand for Risky Assets	97

9.1.3	Risk Pooling and Risk Sharing	101
9.1.4	Evidence on International Portfolio Diversification	105
9.2	Intertemporal Consumption Smoothing	106
9.2.1	A Two-Period Model	106
9.2.2	Evidence on Intertemporal Consumption Smoothing	112
9.3	Recurrent Uncertainty	113
9.3.1	Theoretical Cross-Country Correlations	113
9.3.2	Evidence on International Consumption Smoothing	114
